## 50MM Trapezoid Hump

Online Purchase only for Bangalore

₹ 1300 + Tax ₹ 1950

Brand : RSI

Hsn Code : 4016

Model No. : AISRH50LM

Dimension : 500x350x50MM  
x 2 nos / Meter

Color : Yellow and Black

Reflection : Glass Beads

Capacity : 20-30 Ton

Weight : 15 kg Per Meter

Material : Rubber

UOM : Meter

Offer Price : Above 24 Meters  
only

Availability: In Stock

## Product Details:

### Rubber Road Hump Lane Model

**Speed bumps** (or **speed breakers**) are the common name for a family of traffic calming devices that use vertical deflection to slow motor-vehicle traffic in order to improve safety conditions. Variations include the **speed hump**, **speed cushion**, and **speed table**.

The use of vertical deflection devices is widespread around the world, and they are most commonly found to enforce a low speed limit, under 10 km/h or lower.

**unnathi Speed bumps** are abrupt raised areas, typically 2–3 inches high with a travel length of 12 inches, that can be comfortably crossed at speeds of 5 miles per hour or less. Crossing at higher speeds can cause significant discomfort for the vehicle's occupants. Because unnathi Speed bumps require an immediate and dramatic slowdown, they are often considered to be a liability risk on public streets and other roads where higher speeds are allowed. If you need a speed-control solution for low-speed areas, such as parking lots, garages, and low-traffic private roads, unnathi Speed bumps would be a good option.

**unnathi Speed humps** are designed to slow vehicles while maintaining traffic flow, with a gentler rise and a lower peak height. Their design allows drivers to cross comfortably without sudden braking, allowing traffic to flow smoothly while still controlling speed. unnathi Speed humps are ideal for entertainment venues that accommodate large volumes of traffic, and they are also recommended for residential streets with speed limits of 25 miles per hour or less. If you need a solution for higher-speed areas where smooth traffic flow is essential, consider opting for unnathi Speed humps. Whether you choose unnathi Speed bumps or unnathi Speed humps,

#### Here are a few features to look for:

Choose a model made from recycled rubber, which conforms easily to the road.

Look for embedded reflectors to ensure visibility in low light or at nighttime.

End caps will help preserve your investment by protecting the ends of the speed bump or hump from wear.

Select devices that are easy to install and transport, should you ever need to relocate them.

## Terms & Conditions:

- ✓ Payment : 100% With PO / NEFT / RTGS/ CASH
- ✓ Tax : GST-18% Extra
- ✓ Door Delivery : Transport To Pay / Extra As Actual
- ✓ Delivery : with in 2 Working Days FROM PO.
- ✓ Store Pick up : 9 AM to 5 PM
- ✓ Store Location: <https://g.page/aakaash-innovative-solution>
- ✓ Stock : Call Store 79968 85979

## Installation:

- ✓ Rs. 350+18% GST / Meter.
- ✓ With Anchor Bolts Rs. 450+18% GST / Meter.
- ✓ price Applicable for Bangalore only
- ✓ Minimum : 10 Meters and Above
